## **GENEALOGY ONLINE BECOMES A PARTNER OF PATRONOMIA FOR CREATING AND PRINTING ON-DEMAND FAMILY HISTORY BOOKS**

Paris, October 10, 2019 – **PATRONOMIA and GENEALOGY ONLINE announced on Thursday their partnership and offer now an innovative service for creating and printing on-demand family history books.**

This service will be presented from October 24 to 26 in London at the international genealogy conference RootsTech, where both PATRONOMIA and GENEALOGY ONLINE will have an exhibition stand.

Anyone who traced back his or her ancestors may combine both text and photos in an easy-to-read book, and have it printed in several copies in order to deal them around to family members.

**Family histories are automatically written down in any of the languages handled by PATRONOMIA, and family trees are clearly laid out.**

The Dutch portal GENEALOGY ONLINE becomes thus PATRONOMIA's third partner, after FamilySearch in America in February 2018 and Geneanet in France in December 2018.

Thanks to this new application, **everyone can create in a few minutes a personalized book of any family's history** in different languages: from now on in French, English, Dutch, Spanish and Italian, and later in Finnish, German, Norwegian, Portuguese and Swedish.

The technology used by PATRONOMIA makes it possible to **automate the whole writing of the book and thus guarantee low prices**. The user can flip through his book on the screen and do as many tests and changes as necessary before giving his "ready for press" order and paying online.

Books are printed in France within 3 to 5 days and shipped internationally by Jouve Print.

### **About PATRONOMIA**

PATRONOMIA, since 2012, has been creating innovative web apps for family and probate genealogy. PATRONOMIA is a French company based in Paris, La Défense.
